Subject: Quarterly Investment Portfolio Report – Quarter Ended December 31, 2020

Purpose

These quarterly reports are presented to both the City Council and the Financial Commission to keep both bodies apprised as to the status of the City's investment holding and demonstrate compliance with the City's Investment Policy.

Background

A review of the Investment Portfolio Report Quarter Ended December 31, 2020 was presented and discussed by the Financial Commission on February 16, 2021. The Financial Commission reviewed the Quarterly Investment Portfolio Report ending December 31, 2020 and had a brief discussion on the LAIF yield, which is currently at .458% (for the month of January 2021).

Discussion/Analysis

The summary provided below presents the sum of all City investment holdings. The City's portfolio book value, excluding operating cash, as of December 31, 2020, was \$54,646,352. The City's operating cash, as of December 31, 2020, was \$12,198,575.80.

As of December 31, 2020, 23.1% of the City's portfolio was placed in Federal Agency Securities (Fannie Mae, Federal Home Loan Bank, Federal Home Loan Mortgage and Federal Farm Credit), 12.0% in Asset-Backed Securities, 1.6% in Supra-National Agency Bond, 33.5% in US Treasuries, and 19.1% in medium-term Corporate Notes and Commercial Paper, 8.2% in Certificate of Deposits, 0.8% in Money Markets, with the balance of 1.7% in LAIF. This portfolio mix is illustrated as part of Attachment 1.

Full compliance with the City's Investment Policy is monitored closely and on a per trade basis as illustrated in Attachment 2. In accordance with California Government Code 53646(b)(3), the City of Los Altos has the ability to meet its pool expenditure requirements for the next six months.

As part of these quarterly updates, a status report is prepared by PFM which is included as Attachment 3: Investment Performance Review for the Quarter Ended December 31, 2020. It is important to note that this report highlights the performance of City investments that fall outside its liquid holdings with LAIF. This has been intentionally crafted to isolate the performance of the City's independently managed investments. The total return of the portfolio since inception is 1.41%, which is highlighted on page 17 of the PFM Investment Performance Review Report (Attachment 3).

Portfolio Recap

- Our strategy for the fourth quarter encompassed the following:
 - Approaches carried forward from the third quarter: maintain core allocations in most sectors, match benchmark durations, and carefully manage risk considering various headwinds caused by the uneven and decelerating recovery.
 - Yield spreads returned to near pre-pandemic levels in most sectors at the same time that new supply waned. This limited new investment opportunities in the fourth quarter. As a result, Treasury allocations generally inched higher.
 - After months of consistent supply and attractive value, the river began to run dry in the federal agency sector. Limited new issuance towards year-end slowed new purchases in the sector. However, meaningful additions in prior periods helped boost portfolio returns once again in the fourth quarter.
 - In the supranational sector, light seasonal issuance headlined a quiet close to the year. Excess returns were positive, adding modest value in government-focused portfolios.
 - Investment grade corporates outpaced the performance of most other sectors during the quarter. Corporates proved to be a
 valuable asset class for both the quarter and for all of 2020, despite significant market disruptions early in the year.
 Investors' strong demand for yield pushed spreads even tighter during the fourth quarter, which ended the year near 20year lows.
 - Mortgage-backed securities (MBS) remained a core holding. While the sector's performance was generally positive for the quarter, returns were a mixed bag for the year. Structure, age of issuance, and coupon level drove performance. For example, 15-year collateral outperformed 30-year collateral, while issues with stronger prepayment protection, like agency commercial MBS, performed best. Our preference to avoid securities with heightened prepayment risk continued to be beneficial for portfolio performance.
 - Allocations of AAA-rated asset-backed securities (ABS) were reduced modestly during the final months of 2020. The sector
 posted strong absolute and relative returns for both the fourth quarter and the calendar year while providing diversification
 and incremental income to portfolios. The combination of quiet new issuance towards year end and robust demand limited
 new opportunities in the sector.

Investment Strategy Outlook

- As 2020 ends, the uncertainties of 2021 now come into focus. Significant central bank intervention is expected to continue, and we expect interest rates will remain low for the foreseeable future. The speed of vaccine rollouts will ultimately drive the pace of the anticipated "return to normalcy." Considering the economic uncertainties that remain, we plan on structuring the portfolio to have a neutral duration relative to the benchmark.
- Our outlook for major investment-grade sectors includes the following:
 - Agencies: Strong demand for agency bonds has pushed incremental yield spreads in basis points down to single digits. While portfolios currently include larger allocations relative to prior years when spreads were consistently tight to similarduration Treasuries, holdings for 2021 will be more strategic—reduced holdings of shorter maturities where spreads may be narrower while continuing to participate in attractive longer new issues.
 - Supranationals: Due to collapsed yield spreads, portfolio allocations stand near cyclical lows relative to historical levels. While expectations are tempered in 2021, we remain on the lookout for opportunities to add income relative to Treasuries and agencies, especially if issuance picks up in the first quarter of 2021 as forecasted.
 - Corporates: Continued economic recovery, vaccine rollouts, and supportive monetary policies around the world serve as
 primary tailwinds. Due to incremental income potential, corporates will remain a core, long-term holding. Modestly reduced
 allocations may provide "dry powder" to add to the sector should spreads widen. This may be challenging, though, as
 market demand seems insatiable while issuance is expected to fall from the record new supply seen in 2020.
 - Asset-Backed Securities (ABS): ABS spreads are on the tighter side of their historical ranges. However, demand for ABS remains elevated as investors look for income return in high-quality sectors. Collateral delinquency rates and net losses may increase over the short term but should remain well within expected performance bands as the economy recovers. For example, used vehicle prices remain elevated, which is a positive for residual and recovery values for auto ABS. We will likely maintain core holdings in the sector while opportunistically investing in new issues in 2021.
 - Agency MBS: The combination of the 10-year Treasury yield below 1%, securities trading at a premium, and elevated refinancing activity creates challenges for the MBS sector. As a result, attractive investment opportunities may be limited. Like in other sectors, however, core allocations will be maintained as MBS can provide incremental income and diversification benefits.
