AGENDA ITEM # 5

TO: Hillview Community Center Project Task Force

FROM: J. Logan, Hillview Community Center Project Task Force Process Liaison

SUBJECT: Developing an Interior Space Recommendation

BACKGROUND

The mission of the Hillview Community Center Project Task Force (TF) is to hold public meetings to gather community input and provide a recommendation to the City Council on the interior space allocation and exterior design and layout of the future Hillview Community Center. The architect team, Noll & Tam, will play a key role in assisting the TF with developing an interior space allocation recommendation.

DISCUSSION

In alignment with the vision and guiding principles established by the TF, Noll & Tam will assist the TF to develop an interior space allocation recommendation. Noll & Tam will gather feedback from the TF to identify important elements and priorities they would like to see in the project design. The TF will be divided into subgroups then guided through an interactive exercise designed to identify program elements which will have shared functionality and those which require dedicated space.

Staff has included Attachment A: 2014/15 Civic Center Master Plan Update: Interior and Exterior Priorities, Ranked to provide the TF with a list of interior and exterior priorities, as identified in the 2009 Civic Center Master Plan Project and re-validated by community members during the 2014/15 Civic Center Master Plan Update.
