Subject: Item #14-Nov. 10th Meeting - Community Center Art

Dear Los Altos Council Members,

First, I would like to thank you all for the long hours of service you have devoted to preparation for and participation in Council meetings for the betterment of our city.

I am writing at this time to fully support the Arts Commission proposal for the interior murals for the new community center.

After reading the online report prepared by Jon Maginot and reviewing each page of the proposal and the many illustrations presented, [I would like to urge the acceptance of the proposal](#) by Morgan Bricca and Linda Gass for the murals in the North and South Lobby areas.

Regarding the artistic acoustic tiles — At first, in looking at the budget, I was concerned about the additional cost for the artistic acoustic tiles, but after viewing the mockup drawings of the seating areas with and without the artistic additions, I felt this is an area I would like to sit in and hope that funds can also be found to install such inspiring works of art.

I am sure you have all experienced the bland feeling of entering a building with white featureless walls versus the feeling on seeing such uplifting and inspiring art work as proposed in Item #14 on the agenda. The murals for the north and south areas would create a welcoming atmosphere that all can appreciate and enjoy.

Sincerely,

Sybil Cramer

Honorable Council,

Please support funding for the murals in the new Community Center.

Morgan Bricca and Linda Gass are two excellent, well- respected local artists. We know they will create a mural that's beautiful, educational, and a compliment to the natural look of the building and its landscape. The murals will be a long-lasting legacy, and worthy of the relatively small amount of additional funding required.

Thank you for your consideration,

Gary and Pat Hedden
