

ZONE 3 NEIGHBORHOOD COMMUNITY ENGAGEMENT MEETING SUMMARY

Wednesday, November 13th – 7:00pm – 8:30pm

Santa Rita Elementary

SUMMARY

Issues:

- Reflective paint on street signs
- Pine Rd sign on San Antonio is set back so that by the time you see it, it is too late
 - The northbound sign is before the street and gives you enough time to turn
- Enforcement of gas-powered leaf blowers
- Speeding on Linden Ave
- Other options, instead of developments
- Designate BMR apartments for specific jobs
- Development is pushing traffic and parking into side streets
- Traffic calming on Jordan from San Ant to El Camino.

Tree Planting: Please consider strict requirements for all contractors to add trees to any project. The quantity must more than offset the destruction to trees / greenery as a result of construction.

We have two different ways to mitigate tree destruction. When individuals apply for a tree removal permit, we ask that they replace said tree. This is extremely common, except for properties with a significant number of trees already on the lot, as determined by our planners. We suggest a native tree from our Street Tree Planting List. Additionally, we have a requirement in our Climate Action Plan that each new residential structure (not a single-family home) must include at least one tree.

That being said, there is a want for strict requirements for new trees, especially in the case of construction that destroys existing trees. In these cases, there is a desire for more than just a 1:1 replacement requirement.

University Ave – Bike route is dangerous and should be removed

We are currently in the process of updating our complete streets master plan. Included in this are all the bike routes and new proposed bike routes. We will be having an open house on this in a couple months, so please come out and participate. This open house will be advertised on our City communication channels.

5g

We are having a City Council meeting on Dec 17th for those individuals that would like to speak on this topic. City Council will be deciding whether to reject or accept these cell nodes at that meeting.
