Sierra,
NO! Not acceptable! A 13.25 rear yard setback is unacceptable in Los Altos. And a second story 19.25 setback is unacceptable, too. If one needs that much space they need to dig a basement or purchase two lots. Or live in another town. This request sounds very aggressive and not keeping in the spirit of Los Altos. This is not East Palo Alto.

The noise pollution from a building that close to a rear yard is terrifying! The sight of a building so near a back fence would be ugly! The entire suggestion is stressful.

I discussed this setback with fellow neighbor's at the GPSC yesterday and we were all in agreement - Not Acceptable. And it caused a lot of fear in our discussion that other owners would request decrease setbacks in the future. Why did the City Planning Department even consider such a stupid non environment friendly idea?

Sheryl Johnson
