Subject: Re: 796 Nash Road project

Hi David,

Regarding the plan to build a two-story house at the site of 796 Nash Road, please be advised that the retaining wall located at the rear of the property is 5-plus feet high and over 100 feet long. It was constructed over 40 years ago and has been repaired several times. It is again in need of significant repairs in several sections. Some of the timbers are rotted or split, and the dirt behind the wall is being eroded. Several large trees are also dependent on the stability of the wall. We would like to request that these repairs are made asap.

We own the property just behind this site, but have recently moved to NC, so cannot attend the Design Review Commission's Meeting on August 2nd. Consequently, we would appreciate your passing this message along to whomever can follow up on this request. Thank you.

Donna & Jim Jones
