Subject: Landscaping Request - 61 Coronado Ave

Hello Mr. Gallegos - my wife, Tin Tin, and I are the west adjacent neighbors at 75 Coronado Ave.

We have a hopefully minor request to the landscaping plan for 61 Coronado Ave. Currently there are two Victorian Box Trees (marked T1) planned for the west side of the lot. According to the plans they can reach 30 ft in height. The problem is that these would block sunlight to our solar panels which are on our east facing roof and daylight to our bedrooms. Our request is that they be replaced with trees that would not block the daylight plane to the east face of our home.

Please let us know if there are any questions about this request and if we can discuss at tonight's meeting. Thank you,

Chris Saito and Tin Tin Tun
