8. Progress report to Environmental Commission on 11/13/2017
9. Don Weiden to Summarize Survey Data for Environmental Commission

Personal Vehicle Idling Survey
City of Los Altos Environmental Commission
Survey Taker Name:
The Environmental Commission of the City of Los Altos is conducting a survey to evaluate the prevalence of discretionary private vehicle idling within our community. The results of this survey will be used to help the Environmental Commission evaluate the potential need for and content of an anti-idling program within our community.
Did you know discretionary idling of your vehicle for more than 10 seconds wastes more fuel, is harder on the mechanical systems of your vehicle, and releases more greenhouse gases and toxic pollutants than stopping and restarting your car.
For Information or questions contact J Logan, Assistant City Manager, City of Los Altos, 650-947-2610, jlogan@losaltosca.gov
