AGENDA REPORT SUMMARY

Meeting Date: December 3, 2019

Subject: Quarterly Investment Portfolio Report – Quarter Ended June 30, 2019

Prepared by: Thuyet Dang, Financial Services Manager **Reviewed by:** Sharif Etman, Administrative Services Director

Approved by: Chris Jordan, City Manager

Attachment(s):

- 1. Portfolio Mix Charts
- 2. Investment Policy Compliance Chart
- 3. Investment Performance Review Quarter Ended June 30, 2019

Initiated by:

Staff

Fiscal Impact:

None

Environmental Review:

Not applicable

Policy Question(s) for Council Consideration:

None

Summary:

• This report presents the status of the City's investment portfolio through June 30, 2019. The reporting model has been developed in coordination with PFM Asset Management LLC (PFM), the City's investment portfolio managers.

Staff Recommendation:

Receive the Investment Portfolio Report through June 30, 2019

Subject: Quarterly Investment Portfolio Report – Quarter Ended June 30, 2019

Purpose

These quarterly reports are presented to both the City Council and the Financial Commission to keep both bodies apprised as to the status of the City's investment holding and demonstrate compliance with the City's Investment Policy.

Background

A review of the Investment Portfolio Report Quarter Ended June 30, 2019 was presented and discussed by the Financial Commission on November 18, 2019. The Financial Commission reviewed the Quarterly Investment Portfolio Report ending June 30, 2019 and had a brief discussion on the LAIF yield, which is currently at 2.2%.

Discussion/Analysis

The summary provided below presents the sum of all City investment holdings. The City's portfolio book value, excluding operating cash and bond holdings as of June 30, 2019, was \$84,445,034.

As of June 30, 2019, 4.1% of the City's portfolio was placed in Federal Agency Securities (Fannie Mae, Federal Home Loan Bank, Federal Home Loan Mortgage and Federal Farm Credit), 10.5% in Asset-Backed Securities, 3.9% in Supra-National Agency Bond, 27.9% in US Treasuries, and 15.4% in medium-term Corporate Notes and Commercial Paper, 8.6% in Certificate of Deposits, with the balance of 29.5% in LAIF. This portfolio mix is illustrated as part of Attachment 1.

Full compliance with the City's Investment Policy is monitored closely and on a per trade basis as illustrated in Attachment 2. In accordance with California Government Code 53646(b)(3), the City of Los Altos has the ability to meet its pool expenditure requirements for the next six months.

As part of these quarterly updates, a status report is prepared by PFM which is included as Attachment 3: Investment Performance Review for the Quarter Ended June 30, 2019. It is important to note that this report highlights the performance of City investments that fall outside its liquid holdings with LAIF. This has been intentionally crafted to isolate the performance of the City's independently managed investments. The total return of the portfolio since inception is 1.13%, which is highlighted on page 11, of the PFM Investment Review Report (Attachment 3).

CITY OF LOS ALTOS

Investment Performance Review For the Quarter Ended June 30, 2019

Client Management Team PFM Asset Management LLC

Monique Spyke, Managing Director

50 California Street, Suite 2300

San Francisco, CA 94111 Har

415-982-5544

213 Market Street Harrisburg, PA 17101-2141

SUMMARY

- The second quarter saw plunging interest rates, surging equity prices, mixed economic data, and increasing global growth concerns. While few economists expect the decade-long U.S. expansion to end soon, the Federal Reserve's (Fed) cautionary tone set the stage for rate cuts in the second half of the year.
- U.S. economic conditions are characterized by: (1) solid gross domestic product (GDP) growth in Q1 but more tempered expectations for Q2; (2) strong job growth with a low unemployment rate of 3.7%; (3) softening inflation pressures; and (4) increased downside risks, including a slowdown in manufacturing, weaker business investments, and protracted trade wars.
- At its June meeting, the Federal Open Market Committee (FOMC) maintained the
 overnight fed funds rate at a target range of 2.25% 2.50% but acknowledged soft
 business investment, declining market-based inflation measures, and increased
 uncertainty to the outlook. In their latest assessment of monetary policy, nearly half
 of respondents viewed two rate cuts as appropriate by year-end. In subsequent
 communications, Fed chair Jerome Powell all but assured a first preemptive rate cut
 will occur at the Fed's next meeting on July 30 31.
- Equity investors seemed to rejoice in the Fed's more dovish stance. By quarter-end, domestic equity markets had reversed losses from May and reached new record highs. The S&P 500 returned 4.3% for the quarter and is now up 17.3% for the year —the best first half of a year since 1997.

ECONOMIC SNAPSHOT

- U.S. GDP grew 3.1% in Q1, up from 2.2% in Q4. Growth was driven by an unexpected improvement in net exports and outsized growth in inventories, factors that are not likely to be sustained. But consumer spending, which makes up more than two thirds of total economic output, increased at a slower pace relative to prior quarters. Forecasts for Q2 are substantially lower—generally in the 1.5% to 2.0% range.
- The U.S. labor market remained strong, with average job growth of 172,000 per month in 2019 compared with average gains of 223,000 in 2018. The unemployment rate stood at 3.7% in June, near a 49-year low, as the economy remains at what is considered "full employment." Wages also rose but at a modest 3.1% growth rate over the past year.
- Inflation continued to be tame. The Consumer Price Index (CPI) rose 1.6% over the
 past year while the Fed's preferred inflation gauge, the Core Personal Consumption
 Expenditure (PCE) Price Index, excluding food and energy prices, also rose 1.6%
 over the past year, below the Fed's target of 2%.
- Recent manufacturing data weakened in the face of slowing global demand. The
 most recent Institute for Supply Management (ISM) manufacturing survey fell to a
 30-month low while new orders for manufactured goods have fallen in three of the
 past four months. Conversely, consumer confidence remains near all-time highs
 while retail sales rebounded from weakness in Q1.

INTEREST RATES

- U.S. Treasury yields fell for a third consecutive quarter, with maturities beyond one
 year falling 40 to 50 basis points (bps). The yield on most longer Treasury maturities
 are now near 18-month lows. At quarter-end, the yield on a 3-month Treasury bill
 stood at 2.09%, the 2-year note was 1.76%, the 5-year was 1.77%, and the 10-year
 yielded 2.01%.
- The yield curve reached its greatest level of inversion since 2007, as the spread between the 10-year and 3-month Treasuries reached -28 bps, although it finished the quarter narrower as short-term rates trended lower in expectation of rate cuts.
- Money market yield curves for Treasury bills and commercial paper are also now inverted, reflecting the market's expectation for lower Fed policy rates in the term.
 However, yields on short-term commercial paper and bank certificates of deposit remain attractive versus short-term government securities, despite the inverted curve.

SECTOR PERFORMANCE

- Absolute returns were very strong in Q2 as lower yields pushed prices higher.
 Treasury benchmarks posted some of their strongest quarterly returns in three years. The increasing yield curve inversion further boosted the returns of longer-duration instruments, outperforming shorter-maturity counterparts. For example, the 3-month Treasury bill index returned 0.64% for the quarter, while 5-year and 10-year Treasury indices returned 2.81% and 4.23%, respectively.
- Federal agency returns underperformed similar-duration Treasury securities for the quarter as agency yield spreads continued to trade at very narrow levels. Callable agencies underperformed non-callable structures by a wider margin as the large downward move in yields increased the likelihood of call, limiting price appreciation.
- Modest incremental income on supranational debt compared to federal agencies
 helped buoy modest positive relative performance over the quarter. Despite the
 historically tight level of yield spreads, the sector served as a portfolio diversifier and
 performance enhancer relative to Treasuries and agencies over the past year.
- Following superb performance in Q1, investment-grade corporates continued to be
 one of the best performing sectors in Q2. Despite intra-quarter spread volatility, the
 incremental income from the sector-supported positive excess returns—returns in
 excess of Treasuries adjusted to similar duration. For the second consecutive quarter,
 lower-quality credits outperformed higher-quality issues as risk appetite held firm.
- AAA-rated asset-backed securities (ABS) were modestly additive to performance for the quarter despite spreads bouncing off 10-year lows in June. Within ABS, fixed-rate dominated floating rate structures and credit card collateral outpaced auto loans.
- The continued drop in rates pressured mortgage-backed securities (MBS) in Q2, resulting in underperformance and strongly negative excess returns. The decline in mortgage rates triggered expected increases in principal prepayments, generally a negative for the sector. On the flip side, agency-backed commercial mortgage-backed securities (CMBS) generated positive excess returns in back-to-back quarters as these structures have less prepayment variability and interest rate sensitivity.

CITY OF LOS ALTOS

Portfolio Review

Portfolio Recap

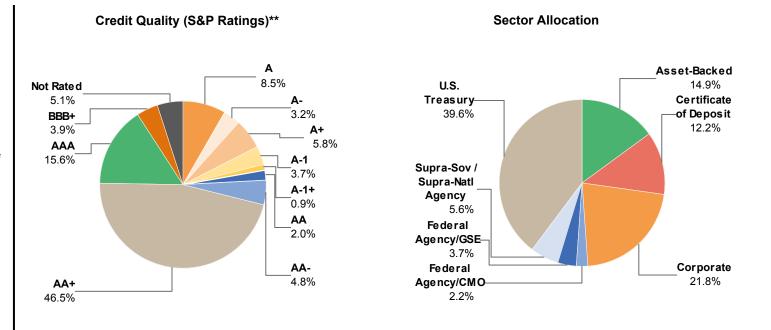

- Interest rates plummeted in the second quarter, with yields on 2- to 5-year Treasury securities falling around 50 basis points (0.50%) to the lowest levels since 2017. Rates fell in response to slowing global growth expectations, weakness in manufacturing due to renewed trade disputes, low inflation, and expectations for multiple Fed rate cuts in the second half of the year. Much of the yield curve remains inverted, where longer-term yields are lower than short-term yields.
- U.S. equity markets reached new all-time highs in the quarter and credit-sensitive fixed income assets performed well despite
 elevated geopolitical risks and yield spreads on corporate bonds widening modestly over the quarter.
- Our strategy throughout the quarter included the following elements:
 - Broad diversification, generally including the widest range of permitted investments, which reduces the overall risk in the portfolio and provides the opportunity for better returns over the long term.
 - We maintained a portfolio duration in line with the benchmark. Maintaining a neutral duration—despite the inverted yield curve—drove strong market-value returns across most fixed-income sectors as market prices on fixed-income securities tend to rise as yields fall.
 - We continued to reduce federal agency allocations as their yields did not offer much value compared to treasury
 alternatives, which has been driven mainly by a lack of new supply. Non-callable agencies generated small outperformance due to their modestly higher yields, but callable agencies underperformed as lower rates increased the
 likelihood of a call before maturity.
 - Corporate yield spreads remain tight by historical standards but widened briefly amid trade tensions. Corporates generated
 excess returns for the second consecutive quarter. We focused allocations on high quality issuers with relatively less
 exposure to international trade risks. We also had a slight preference for industrials over financials in the quarter.
 - We continued to modestly increase agency MBS allocations, specifically agency commercial MBS (CMBS). Performance in the agency MBS sector was mixed for the second quarter, with agency CMBS outperforming pass-through securities. Asset-backed securities (ABS) spreads declined to 10-year lows throughout the first half of the quarter, providing incremental returns relative to Treasuries. By June, ABS spreads began to widen slightly but still remained low by historical standards.
 - Short-term negotiable bank CD yield spreads narrowed in the second quarter, reducing their overall attractiveness. By quarter-end, the money market yield curve was also inverted.

Investment Strategy Outlook

- While we expect U.S. and global economic growth to moderate in the second half of the year amid elevated risks to the economy, we do not believe a recession is imminent.
- The Fed has officially shifted its stance on monetary policy from "patient" to "appropriate," and rates have continued to move lower. As such, our view is to continue to maintain a portfolio duration in line with the benchmark in order to minimize risk and optimize performance relative to the benchmark in the event yields continue to decline. While market-implied probabilities and economist surveys strongly suggest that the Fed will cut rates as early as July, the key questions of "when" and "how much" will drive our strategy over the rest of the year.
- Our outlook for each of the major investment-grade fixed-income sectors are as follows:
 - Federal agency spreads are very tight and we expect them to remain so. Although callable agency spreads are wider than they have been in a while, the sharp downward move in rates has reduced the likelihood of outperformance.
 - In supranationals, supply constraints have led us to recalibrate our strategy to account for lower allocations. We will still seek to add supranationals to the portfolio as attractive issues become available.
 - As a result of the Fed's more accommodative stance and our positive view of the corporate sector, we will maintain corporate allocations and seek to modestly extend the duration of our allocations, while remaining diligent in our issuer and security selection process.
 - ABS spreads have recently widened back to levels that offer attractive incremental income compared to government and credit alternatives. We will seek to maintain allocations.
 - The decline in mortgage rates, increase in paydowns, and the Fed's ongoing reduction in the holdings of agency MBS on their balance sheet are expected to continue. Our focus will be on specific structures, like agency CMBS, that offer incremental income and prepayment stability.
 - Historically tight spreads have also reduced the range of high-quality, short-term credit issues that offer adequate
 incremental income to warrant purchase. Careful maturity selection around Fed meeting expectations will be an important
 consideration going forward, particularly with both the Treasury and credit yield curves inverted.

IMPORTANT DISCLOSURES

This material is based on information obtained from sources generally believed to be reliable and available to the public; however, PFM Asset Management LLC cannot guarantee its accuracy, completeness or suitability. This material is for general information purposes only and is not intended to provide specific advice or a specific recommendation. All statements as to what will or may happen under certain circumstances are based on assumptions, some, but not all of which, are noted in the presentation. Assumptions may or may not be proven correct as actual events occur, and results may depend on events outside of your or our control. Changes in assumptions may have a material effect on results. Past performance does not necessarily reflect and is not a guaranty of future results. The information contained in this presentation is not an offer to purchase or sell any securities.

- Market values that include accrued interest are derived from closing bid prices as of the last business day of the month as supplied by Interactive Data, Bloomberg, or Telerate. Where prices are not available from generally recognized sources, the securities are priced using a yield based matrix system to arrive at an estimated market value.
- In accordance with generally accepted accounting principles, information is presented on a trade date basis; forward settling purchases are included in the monthly balances, and forward settling sales are excluded.
- Performance is presented in accordance with the CFA Institute's Global Investment Performance Standards (GIPS). Unless otherwise noted, performance is shown gross of fees. Quarterly returns are presented on an unannualized basis. Returns for periods greater than one year are presented on an annualized basis. Past performance is not indicative of future returns.
- Bank of America/Merrill Lynch Indices provided by Bloomberg Financial Markets.
- Money market fund/cash balances are included in performance and duration computations.
- Standard & Poor's is the source of the credit ratings. Distribution of credit rating is exclusive of money market fund/LGIP holdings.
- Callable securities in the portfolio are included in the maturity distribution analysis to their stated maturity date, although, they may be called prior to maturity.
- MBS maturities are represented by expected average life.

CITY OF LOS ALTOS

Appendix

GLOSSARY

- ACCRUED INTEREST: Interest that is due on a bond or other fixed income security since the last interest payment was made.
- AGENCIES: Federal agency securities and/or Government-sponsored enterprises.
- AMORTIZED COST: The original cost of the principal of the security is adjusted for the amount of the periodic reduction of any discount or premium from the purchase date until the
 date of the report. Discount or premium with respect to short-term securities (those with less than one year to maturity at time of issuance) is amortized on a straight line basis.
 Such discount or premium with respect to longer-term securities is amortized using the constant yield basis.
- BANKERS' ACCEPTANCE: A draft or bill or exchange accepted by a bank or trust company. The accepting institution guarantees payment of the bill as well as the insurer.
- COMMERCIAL PAPER: An unsecured obligation issued by a corporation or bank to finance its short-term credit needs, such as accounts receivable and inventory.
- CONTRIBUTION TO DURATION: Represents each sector or maturity range's relative contribution to the overall duration of the portfolio measured as a percentage weighting. Since duration is a key measure of interest rate sensitivity, the contribution to duration measures the relative amount or contribution of that sector or maturity range to the total rate sensitivity of the portfolio.
- **DURATION TO WORST:** A measure of the sensitivity of a security's price to a change in interest rates, stated in years, computed from cash flows to the maturity date or to the put date, whichever results in the highest yield to the investor.
- EFFECTIVE DURATION: A measure of the sensitivity of a security's price to a change in interest rates, stated in years.
- **EFFECTIVE YIELD:** The total yield an investor receives in relation to the nominal yield or coupon of a bond. Effective yield takes into account the power of compounding on investment returns, while nominal yield does not.
- FDIC: Federal Deposit Insurance Corporation. A federal agency that insures bank deposits to a specified amount.
- INTEREST RATE: Interest per year divided by principal amount and expressed as a percentage.
- MARKET VALUE: The value that would be received or paid for an investment in an orderly transaction between market participants at the measurement date.
- MATURITY: The date upon which the principal or stated value of an investment becomes due and payable.
- NEGOTIABLE CERTIFICATES OF DEPOSIT: A CD with a very large denomination, usually \$1 million or more, that can be traded in secondary markets.
- PAR VALUE: The nominal dollar face amount of a security.

GLOSSARY

PASS THROUGH SECURITY: A security representing pooled debt obligations that passes income from debtors to its shareholders. The most common type is the
mortgage-backed security.

- REPURCHASE AGREEMENTS: A holder of securities sells these securities to an investor with an agreement to repurchase them at a fixed price on a fixed date.
- SETTLE DATE: The date on which the transaction is settled and monies/securities are exchanged. If the settle date of the transaction (i.e., coupon payments and maturity proceeds) occurs on a non-business day, the funds are exchanged on the next business day.
- TRADE DATE: The date on which the transaction occurred; however, the final consummation of the security transaction and payment has not yet taken place.
- UNSETTLED TRADE: A trade which has been executed; however, the final consummation of the security transaction and payment has not yet taken place.
- U.S. TREASURY: The department of the U.S. government that issues Treasury securities.
- YIELD: The rate of return based on the current market value, the annual interest receipts, maturity value, and the time period remaining until maturity, stated as a percentage on an annualized basis.
- YTM AT COST: The yield to maturity at cost is the expected rate of return based on the original cost, the annual interest receipts, maturity value, and the time period from purchase date to maturity, stated as a percentage on an annualized basis.
- YTM AT MARKET: The yield to maturity at market is the rate of return based on the current market value, the annual interest receipts, maturity value, and the time period remaining until maturity, stated as a percentage on an annualized basis.
