AGENDA ITEM # 4

TO: Library Commission

FROM: Peggy Ford, Staff Liaison

SUBJECT: Discuss Improvements on Main Library Pathways

DISCUSSION

At the August 2016 Library Commission meeting, the Library Commission agreed to put on the September meeting agenda a discussion topic regarding library pathways.

Previously, the City's Parks Division completed some work on pathways that lead from the Main Library parking to the Library. These paths have been improved by cutting back roots and adding decomposed granite in order to make a more level pathway. There are additional "natural, man-made" pathways that could potentially be improved as well – allowing for safer travel to and from the library parking lot.

The Library Commission will review additional pathways and make recommendations.
