

DATE: March 30, 2017

AGENDA ITEM # 4

TO: Public Arts Commission

FROM: Jon Maginot, Staff Liaison

SUBJECT: Call for art

RECOMMENDATION: Review submissions and determine next steps in selection process

BACKGROUND

The Public Arts Commission (PAC) recently conducted a call for submissions of sculptures to be a part of the Outdoor Sculpture Loan Program. Submissions were due to the City on March 15, 2017.

DISCUSSION

Eight artists submitted a total of 15 pieces to be considered by the PAC at its March 30, 2017 meeting.

It is recommended that the PAC review these pieces and determine the next steps to be taken in the selection process. Potential next steps could include one or more of the following: Review of the pieces by the full Commission; Establishing a subcommittee to make recommendations on the various pieces, establishing a jury to select pieces; Extending the submission deadline in the hopes of recruiting more pieces.

1. Sculpture Loan Program entry forms

Annual Public Sculpture Search City of Los Altos, California

Entry Form

Each entry requires a separate Entry Form. **Return by March 15, 2017.**

\$1,000 Artist Stipend provided if accepted into the program.

Please submit:

- Completed Entry Form
- Three color photos (different perspectives) either by e-mail or hard copy. Minimum hard copy size: 5" x 7" (prefer 8" x 10"). Each photo should include name of the sculptor, title of sculpture, brief description of the sculpture and inspiration for the piece. At least one photo must be a close-up showing a detailed look of the artwork.
- Supplemental statement of additional installation guidelines, if any.
- Short biography of the artist

E-mail, mail or deliver to: City of Los Altos, Public Arts Commission
1 N San Antonio Road, Los Altos, California 94022
E-mail: administration@losaltosca.gov

Los Altos Public Art Search 2017

Submissions due by March 15, 2017

A residential community in the heart of Silicon Valley, Los Altos is the boyhood home of Steve Jobs, the birthplace of Apple Computer and home to many of the region's tech industry leaders. The city showcases art from around the world in its downtown streets and parks and is currently looking to display new works representing a variety of media, including sculpture, mosaics, electronic and interactive art, and other forms of visual expression. The City is especially interested in showcasing an interactive artwork in its Veterans Community Plaza (<http://bit.ly/2hdjzq5>). Special consideration is given to art that reflects the city's agricultural past and/or the community's current ties to developments in technology.

About the Public Art Loan Program

Artists whose work is selected for inclusion receive a \$1,000 stipend to help defray costs. Both the artists and their work will be promoted through local newspapers, on the city's website, and in a citywide Arts Tour brochure. All selected work will be on loan for a period of two years.

Size Requirements

Sculptures may have bases measuring from 3' x 3' to 6' x 6'. Other installations will need to fit within the constraints of the selected venues, leaving adequate space for pedestrian and bicycle traffic.

This abstract 10' tall Chief started out as an expression of basics of vision, feelings, and gut instinct; influenced by the Colorado native Utes, as well as many other Western tribes, such as the Apaches represented by 2 1959 Chevy Apache truck trim pieces as arrows. It's abstract form shows the strength and resiliency of the history of America's First Peoples, using parts from the Golden Age of American manufacturing, all deconstructed and then reconstructed in my style. 19 steam iron bases as the heat and pressure of cultures and the West; bed frame rails as support in construction, motorcycle mufflers, waffle iron, vintage car bumper bows, store clothing racks, picnic table... all complete a picture creating a strong sculpture.

I started creating assemblage art in 1996, and I saw in the bulk of what I was finding at thrift stores and flea markets my own vision of what craftsmen before me had put into details for vision and expression of futurism. My first inspiration was a deco vacuum cleaner and it's lines, and the anonymous draftsman who created it. There is no welding in my work, as I find parts that have never seen each other that mesh and form my style in a clean professional fit. My work is for the peaceful exploration of time, space, ideas, and cultures; and this piece reflects the strength of Natives in America. Recycling is a major key, and the finding of the raw materials is a large share of the end result, of which I am a professional in acquiring the vintage and beautiful treasure of the Golden Age of American manufacturing. I am a Severe ReConstructivist seeking the cool inspirational message.

Subject: Descant, Reverse Prometheus
Attachments: LosAltosDescant2.pdf; reverse1.jpg; reverse2.jpg; reverse3.jpg; reverse4.jpg; reverse5.jpg; reverse6.jpg

This displayed sculpture, "Reverse Prometheus" started with an old hot water tank that I covered in aluminum diamond plate, and added all my artistic touches. I don't do any welding in my constructions, but in this case had to have some fabrication done for the final mounting of the rocket body. The parts I find and bolt together have never seen each other before being installed in this project. I generally find parts and objects in flea markets, garage sales, junkyards, and even in the trash. Mostly previously manufactured parts from the golden era of American craftsmanship and mechanical production. A time when we were the producers as well as the consumers of high quality durable goods and tools of human existence made by anonymous every day artisans who touched our lives. I see in these parts the future craved for and ushered in, given up for a while, and now rising again in technology, space travel, and quality of workmanship in the tools of human existence.

As a sculptor, I give back to the gods that which Prometheus stole and bestowed upon us lowly humans... the fire which over thousands of years we have deliberately used for destruction and sins against our own, our world, and even the heavens. But ah, the rub, the yin to yang of an artist's soul, I also send out and present to the gods that which is good in Mankind. That fire that warmed our neighbor, that light that shone on cave paintings, that electrical spark harnessed for communication and connection, that radio call sent into deep space and waiting for an answer. That possible future.

Sculpture price \$25,000

In Greek mythology, Prometheus is a Titan, the son of Iapetus and Themis, and brother to Atlas, Epimetheus and Menoetius. He was a champion of human-kind known for his wily intelligence, who stole fire from Zeus and gave it to mortals Zeus then punished him for his crime by having him bound to a rock while a great eagle ate his liver every day only to have it grow back to be eaten again the next day. His myth has been treated by a number of ancient sources, in which Prometheus is credited with – or blamed for – playing a pivotal role in the early history of humankind.

Eileen Fitz-Faulkner

Art Bio 2017

I live in a material world. Materials of all kinds fascinate me. I work to create fanciful impressions of the world with colorful flair. My work is often playful, exuberant and humorous. A lifelong passionate maker of objects, I enjoy using various mediums to bring life to my art. My current focus is on concrete and steel creations usually painted or tiled. The ability to sculpt and shape my work by hand gives me a lot of satisfaction as I smooth a piece to life.

Over fifteen years ago I rekindled my love of sculpture creating the fanciful outdoor playground Frogpark, in Oakland California. That became the start of a new era of art in my life. Now primarily working in concrete, I sculpt figures, large fruit, eggs, animal sculptures and murals to enliven garden and living spaces. My work can be seen throughout Northern California in variety of Exhibitions and private collections.

Flag Status: Completed

Hi Jon,

Thank you for let me know about Los Altos public Art program.

I would like to use this opportunity to introduce myself. I'm a local sculptor resident of East Palo Alto an international man and product of globalization.

I have a couple interactive sculptures designed as climbing structures for kids that could be a nice addition to any park.

Made in GFRC (glass fiber reinforced concrete) durable for outdoors and safe for kids. If used as playground sculpture must have soft ground like wood chips or sand.

Opus is 10'-6" x 4' x 8' high weight about 2000 lb. , and Queen & Pawn a set of two pieces 4'-6" x 4'-6" x 10' and 4' x 4' x 8' weight about 450 lb. per piece.

Perhaps Los Altos could be interested? These works available for a loan or purchase.

Also I just completed a major project and want to share with you. Sea Foam sculpture installation in Huntington Beach, CA went smoothly without any problems. This work was inspired by Pacific Ocean. It represents union of water and air under energy/pressure of natural forces. Carrara marble, 11.5' high. 13 000 lb.

Please, let me know if any comments or questions you might have. Video on installation: https://www.dropbox.com/s/oepquydlxovi8ke/20161213_115007.mp4?dl=0

Thank you,

Subject: "Rope & Wood" | Entry for Annual Public Sculpture Search, City of Los Altos
Attachments: LosAltosPublicArt_Fontanilla2017.pdf; Fontanilla_entry_form_2017.pdf

Dear Members of the Los Altos Public Sculpture Search Committee:

Enclosed please find my entry materials for a proposed interactive sculpture, "Rope & Wood," that would be designed and built specifically to reflect the history of industry in the City of Los Altos. The attached supplemental documentation offers a successfully exhibited iteration of the proposed sculpture, as well as detail shots that depict aesthetic approaches to sculptural finishes.

The sculpture installed throughout the City of Los Altos has spawned many an interesting conversation in my family about the city's history and influence. My spouse and I, along with our two closest friends who call Los Altos home, are invested and enamored by Los Altos. The prospect of engaging the city through artwork would be a thrilling opportunity.

With my thanks and deep appreciation for your consideration and time --
Sincerely,
Edrex Fontanilla, MFA

Brief description highlighting your inspiration for the piece The interactive sculpture's rope and pulley system, along with the resultant sound that it generates, metaphorically connect the physically strenuous industries of yesteryear to the technological heavy-lifting of today's knowledge worker.

Where did you hear about the Los Altos Sculpture Search? Two of my closest friends I visit call Los Altos their home, and I've been enamored by the sculpture installed throughout the city. This year's call for work that speaks to the city's past and technological orientation resonate deeply with my art practice.

Edrex Fontanilla would like to propose **Rope & Wood**, an interactive installation which employs a rope and pulley system and spatialized sound. Locally-captured sound — a mix of pre-captured as well as real-time recordings of sound — auralize the relationship between local business activities in the immediate vicinity, cultural referents and sounds related to Los Altos' agricultural past, and the actions of visitors. The audio samples will be manipulated using custom-written software, and broadcast to change the perceived size and shape of the internal cavities. At certain moments the sound transports participants to chambers in distant locales, and at other times the aural vignettes depict the professional practices of the local community and Los Altos writ large. As such, these augmented interactions become a form of urban intervention that employ small-gauge storytelling¹ about which I have written² for the Mediapolis Journal.

The build will be robust and designed to withstand outdoor weather and rough interactions. The shape and configurations will conform to the attributes of the installation site recommended by the selection committee. Availability of electricity and exposure to sunlight during the day will determine design of the sculpture electronics (such as integration of solar panels and battery packs).

Edrex Fontanilla is a NYC-based artist and professor of digital media at Marymount Manhattan College. Informed by research interests in psychology and cognitive science, he employs technology to augment and to fracture perception, and towards the manifestation of unique, experiential moments. Over the past decade, his work has been exhibited in venues that fuse technology and the arts, such as Boston CyberArts, SIGGRAPH, and most recently at TechFest in India.

Project Specifications:

Every component of the proposed installation with working title, “Rope & Wood,” will be designed and fabricated from scratch, after I have had the opportunity to carefully examine the installation site in Los Altos. For instance, the accessibility of the sculpture’s rope interface would be adapted differently if it were to be installed at the Veterans Community Plaza versus another site. The embedded images below offer the selection committee an example of the aesthetics and mechanics of the interactivity.

The previous incarnation of Rope & Wood, which exhibited previously at Boston CyberArts, serves as a proof-of-concept of a rope and pulley interface. The sculpture stands over 8 feet tall and has a footprint of 6 x 6 feet. Designed to allude to a medieval contraption, it invites the participant to explore the various methods that they can manipulate the rope in order to generate mechanical and — unbeknownst to the viewer — digitally generated sound.

Aesthetics

The finish and shape of Rope & Wood will be influenced in large part by the attributes of the architecture surrounding the installation, such that the sculpture will appear to be part of the history of the installation environment.

One example of one such strategy is a Virtual Reality viewer, *Hidden Vistas*, shown recently at the Queens Museum. The VR interactive documentary depicted liminal spaces — urban detritus along NYC waterfronts. The viewer head and base were constructed to appear as if weathered wood might have sat along the Flushing River for several years.

Annual Public Sculpture Search City of Los Altos, California

Entry Form

Each entry requires a separate Entry Form. **Return by March 15, 2017.**

\$1,000 Artist Stipend provided if accepted into the program.

Please submit:

- Completed Entry Form
- Three color photos (different perspectives) either by e-mail or hard copy. Minimum hard copy size: 5" x 7" (prefer 8" x 10"). Each photo should include name of the sculptor, title of sculpture, brief description of the sculpture and inspiration for the piece. At least one photo must be a close-up showing a detailed look of the artwork.
- Supplemental statement of additional installation guidelines, if any.
- Short biography of the artist

E-mail, mail or deliver to: City of Los Altos, Public Arts Commission
1 N San Antonio Road, Los Altos, California 94022
E-mail: administration@losaltosca.gov
Phone: (650) 947-2720

Artist Name JANE REYES
Title of Piece "BIRDS OF A FEATHER" Value \$ 1000.00
Medium (including finishes) CLAY W/ GLAZES
Artwork Measurements (h"x w" x d") 5' x 4" x 4" Total Weight _____
Type of base recommended WELDED STEEL
Your Street Address 220 MARVISTA DR Sp 4
City, State, Zip ALTOS, CA 95003
Home Phone/Cell Phone 831-661-0458, 831-227-9094
E-mail Address janeereyes@Cruzio.com
Brief description highlighting your inspiration for the piece _____

My inspiration comes from NATURE
