EXECUTIVE SUMMARY

INTRODUCTION

In accordance with the agreement held between The City of Los Altos, agreement CF-01003 and Faithful+Gould Inc, this completed report provides a comprehensive Facility Condition Assessment of the Halsey House located at 482 University Ave, Los Altos, California, 94022-3518 (The Property).

This report provides a summary of the facility information known to us at the time of the study, the scope of work performed, an equipment inventory, evaluation of the visually apparent condition of The Property together with a forecast of capital expenditures anticipated over the next 10 years. We have provided an outlook of anticipated expenditures with no minimum value within the online iPlan™ capital planning database. The expenditure forecast does not account for typical preventative maintenance items such as changing filters to fan coil units.

Our cost rates to produce life cycle and replacement cost estimates are based on our knowledge of the local regional market rates. Our line item costs assume that the work will be undertaken by either in-house or direct sub-contract labor. If the work is procured through public general contractor bids, we recommend budgeting for additional project costs of between 25%-35% to allow for professional fees and general contractor overhead/profit and management costs.

The report provides a summary of the anticipated primary expenditures over the 10-year study period. Further details of these expenditures are included within each respective report section and within the 10-year expenditure forecast, in Appendix A.

The report also calculates the Facility Condition Needs Index (FCNI) of the facility based upon the calculated FCNI. Further discussion of the Facility Condition Needs Index is detailed in the sections below.

LIMITING CONDITIONS

This report has been prepared for the exclusive and sole use of the City of Los Altos. The report may not be relied upon by any other person or entity without the express written consent of Faithful+Gould.

Faithful+Gould accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made, or actions taken, based on this report.

The assessment of the building/site components was performed using methods and procedures that are consistent with standard commercial and customary practice as outlined in ASTM Standard E 2018-015 for PCA assessments. As per this ASTM Standard, the assessment of the building/site components is based on a visual walk-through site visit, which captured the overall condition of the site at that specific point in time only.

No legal surveys, soil tests, environmental assessments, geotechnical assessments, detailed barrier-free compliance assessments, seismic assessments, detailed engineering calculations, or quantity surveying compilations have been made. No responsibility, therefore, is assumed concerning these matters. Faithful+Gould did not design or construct the building(s) or related structures and therefore will not be held responsible for the impact of any design or construction defects, whether or not described in this report. No guarantee or warranty, expressed or implied, with respect to the property, building components, building systems, property systems, or any other physical aspect of The Property is made.

The recommendations and our opinion of probable costs associated with these recommendations, as presented in this report, are based on walk-through non-invasive observations of the parts of the building which were readily accessible during our visual review. Conditions may exist that are not as per the general condition of the system being observed and reported in this document. Opinions of probable costs presented in this report are also based on information received during interviews with operations and maintenance staff. In certain instances, Faithful+Gould has been required to assume that the information provided is accurate and cannot be held responsible for incorrect information received during the interview process. Should additional information become available with respect to the condition of the building and/or site elements, Faithful+Gould requests that this information be brought to our attention so that we may reassess the conclusions presented herein.

The opinions of probable costs are intended for global budgeting purposes only. The scope of work and the actual costs of the work recommended can only be determined after a detailed examination of the site element in question, understanding of the site restrictions, understanding of the effects on the ongoing operations of the site/building, definition of the construction schedule, and preparation of tender documents.

PROJECT DETAILS

On July 28, 2016, FGUS: Mark Collett of Faithful+Gould visited The Property to observe and document the condition of the building and site components. During our site visit, Faithful+Gould was assisted by David Fanucchi (Facilities / Fleet Supervisor) who is associated with the City of Los Altos.

BUILDING DESCRIPTION

PROPERTY EXECUTIVE SUMMARY

The Halsey House is located at 482 University Ave, City of Los Altos, California and was constructed circa 1923. It is noted as being No. 6 on the Los Altos Historic Landmark Register. The building was formerly a residence and until recently was utilized as a nature center and community meeting center. The property is built around a courtyard with a u-shaped floorplan with two wings, both of which are one-room wide. The building was converted to community use in the 1970's and a septic tank added in the 1980's, as far as we are aware there have been no major additions.

The building is no longer in use and has fallen victim to vandalism, with many windows and doors broken. Based on our assessment we believe the building to have significant structural integrity issues with observed active leaks in the roof and severe degradation the floor. The building is currently boarded up and our access was limited to initial rooms, due to the hazards present inside.

ARCHITECTURAL STRUCTURE EXECUTIVE SUMMARY

The Halsey House is located at 482 University Ave, City of Los Altos, California and was constructed circa 1923. It is noted as being No. 6 on the Los Altos Historic Landmark Register. The building was formerly a residence and until recently was utilized as a nature center and community meeting center. The property is built around a courtyard with a u-shaped floorplan with two wings, both of which are one-room wide. The building was converted to community use in the 1970's and a septic tank added in the 1980's, as far as we are aware there have been no major additions.

The building is no longer in use and has fallen victim to vandalism, with many windows and doors broken. Based on our assessment we believe the building to have significant structural integrity issues with observed active leaks in the roof and severe degradation to the floor, walls and ceiling. The building is currently boarded up and our access was limited to initial rooms, due to the hazards present inside.

MECHANICAL EXECUTIVE SUMMARY

The building appeared to heated by means of wall heaters, with the fuel type being unknown. There are also two open-flue chimneys. Domestic hot water we assume is provided, however we did not observe any water heaters. It is assumed there is no fire suppression system or a wet pipe fire suppression system present in the building.

ELECTRICAL EXECUTIVE SUMMARY

The electrical system consists of a main distribution panel. Interior lighting is comprised of surface mounted and recessed fluorescent fixtures in the suspended ceiling.

October 18, 2016

SITE EXECUTIVE SUMMARY

The building is situated on a large plot and is part of the Redwood Grove Nature Preserve. There is no vehicular access or parking to the building. There is an asphalt path that leads to and from the building leading through Redwood Grove. The building is surrounded by landscaping and has a large concrete patio to the north, as well as an area of grass lawn, with various shrubs and large mature trees located throughout the site, including large specimen redwoods.

SUMMARY OF FINDINGS

FACILITY CONDITION NEEDS INDEX

In this report we have calculated the Facility Condition Needs Index (FCNI) for the facility; illustrating the likely condition of the systems, equipment and building needs should the required funding not be expended over the cost study period. The FCNI is used in Facilities Management to provide a benchmark to compare the relative condition and needs of a group of facilities. The FCNI is primarily used to support asset management initiatives of federal, state, and local government facilities organizations.

The FCNI is the ratio of accumulated Deferred Maintenance (DM) (total sum of required and recommended works) and Needs (ADA) to the Current Replacement Value (CRV) for a constructed asset. Calculated by dividing DM and Needs by CRV (in this instance we have applied an Adjusted Replacement Value (ARV) to the CRV to reflect to value of the partial building assessment). The range is from zero for a newly constructed asset, to one for a constructed asset with a DM value equal to its CRV. Acceptable ranges vary by Asset Type, but as a general guideline, the FCNI scoring system is as follows:

FCNI=

Maintenance, Repair, Needs and Replacement Deficiencies of the Facility(s)

Current Replacement Value of the Facility(s) (CRV)

If the FCNI rating is 60% or greater then replacement of the asset/building should be considered instead of renewal.

Condition	Definition	Percentage Value
GOOD	FAIR In a new or well-maintained condition with no visual evidence of wear, soiling or other deficiencies. Subject to wear and soiling but is still in a serviceable and functioning condition. Subjected to hard or long-term wear. Nearing the end of its useful or serviceable life.	
FAIR		
POOR		
V-POOR	Subjected to hard or long-term wear. Has reached the end of its useful or serviceable life. Renewal now necessary.	Greater than 60%

The chart below indicates the current FCNI ratio of the Halsey House building.

A SUBSTRUCTURE SYSTEMS

A10 FOUNDATIONS

A1011 Wall Foundations

DESCRIPTION

The exterior wall construction is supported by reinforced concrete spread footings around the perimeter of the building. The compressive strength of the concrete is unknown.

CONDITION

The footings are not visible due to their location below the exterior wall construction. However there is no deterioration to the wall constructions that they are supporting, therefore we assume them to be in fair condition and free from defects. We do not anticipate a requirement for replacement during the study period.

B SHELL SYSTEMS

B10 SUPERSTRUCTURE

B1012 Upper Floors Construction

DESCRIPTION

The suspended first floor above the graded area appeared to consist of traditional wood beams with a wood floor covering above. The size and extent of the crawl space below the suspended floor is unknown.

CONDITION

The floor suspended floor was observed to be in generally fair to poor condition, however, there is localized damage due to water penetration from roof leaks around the chimney. Replacement and or repair will be necessary early in the study period.

B1022 Pitched Roof Construction

DESCRIPTION

The pitched roof is comprised of a traditional wood trusses and wood deck with a clay tile roof covering.

CONDITION

The roof construction appears to be in fair condition, however, prolonged localized roof leaks have compromised the structure in certain areas. Local repairs and or replacement of the roof structure is anticipated during the study period.

PROJECTED EXPENDITURES

Identified recommended works that are required during the 10-year study period are scheduled below. We recommend budgeting for additional project costs of between 25%-35% to allow for professional fees and general contractor overhead/profit and management costs.

ID	Type	Recommendation	Priority	Year	Expenditures
157231	B1010	Replace Upper Floor Wood	Priority 2	2016	\$110,741

B20 EXTERIOR ENCLOSURE

B2011 Exterior Wall Construction

DESCRIPTION

The exterior wall construction at the building is predominately wood framed with an exterior stucco finish and a plaster interior finish. There is also a masonry chimney with a painted stucco finish.

CONDITION

The exterior wood frame structure appeared to be in poor condition with certain areas of water penetration and damage to the stucco finish. There is also localized water penetration around the masonry chimney structure. We anticipate repairs and or replacement will be necessary during the study period.

B2021 Windows

DESCRIPTION

The building contained large areas of single pane, wood frame sash windows and glazed doors and French doors at the exterior elevations.

CONDITION

The windows appeared to be in poor condition due to heavy vandalism and are boarded up. From our limited observation of the windows not vandalized we noted some deterioration of frame and/or glass which would require actions and the frames are over their EUL of thirty years, therefore we recommend replacement of all windows during the study period.

B2039 Other Doors & Entrances

DESCRIPTION

The property contained eight single exterior wood doors, we assumed that these are all glazed, there were also eight sets of external French doors to the exterior elevations, including the courtyard.

CONDITION

The doors appeared to be in poor condition due to heavy vandalism and have been boarded up. Those doors not vandalized are over their EUL of thirty years, therefore we recommend replacement of all doors during the study period.

B30 ROOFING

B3011 Roof Finishes

DESCRIPTION

The roof was covered in clay roof tile covering with perimeter gutters and downspouts.

Acronyms & Glossary of Terms

BTU – British Thermal Unit; the energy required to raise the temperature of one pound of water by one degree.

Building Envelope - The enclosure of the building that protects the building's interior from the outside elements, namely the exterior walls, roof and soffit areas.

Building Systems – Interacting or independent components or assemblies, which from single integrated units, that comprise a building and its site work, such as, pavement and flatwork, structural frame, roofing, exterior walls, plumbing, HVAC, electrical, etc.

Caulking – Soft, putty-like material used to fill joints, seams, and cracks.

Codes - See building codes.

Component - A fully functional portion of a building system, piece of equipment, or building element.

Deferred Maintenance – Physical deficiencies that cannot be remedied with routine maintenance, normal operating maintenance, etc., excluding de minimis conditions that generally do not present a material physical deficiency to the subject property.

Expected Useful Life (EUL) – The average amount of time in years that an item, component or system is estimated to function when installed new and assuming routine maintenance is practiced.

Facility – All or any portion of buildings, structures, site improvements, complexes, equipment, roads, walks, passageways, parking lots, or other real or personal property located on site.

Flashing – A thin, impervious sheet of material placed in construction to prevent water penetration or to direct the flow of water. Flashing is used especially at roof hips and valleys, roof penetrations, joints between a roof and a vertical wall, and in masonry walls to direct the flow of water and moisture.

Remaining Useful Life (RUL) – A subjective estimate based upon observations, or average estimates of similar items, components, or systems, or a combination thereof, of a number of remaining years that an item, component, or system is established to be able to function in accordance with its intended purpose before warranting replacement. Such period of time is affected by the initial quality of an item, component, or system, the quality of the initial installation, the quality and amount of preventative maintenance exercised, climatic conditions, extent of use, etc.

Thermal Resistance (R) – A unit used to measure a material's resistance to heat transfer. The formula for thermal resistance is: R = Thickness (in inches)/K

Structural Frame – The components or building systems that support the building's non-variable forces or weights (dead loads) and variable forces or weights (live loads).

Warranty – Legally enforceable assurance of quality or performance of a product or work, or of the duration of satisfactory performance. Warranty guarantee and guaranty are substantially identical in meaning; nevertheless, confusion frequently arises from supposed distinctions attributed to guarantee (or guaranty) being exclusively indicative of duration of satisfactory performance or of a legally enforceable assurance furnished by a manufacturer or other third party. The uniform commercial code provisions on sales (effective in all states except Louisiana) use warranty but recognize the continuation of the use of guarantee and guaranty.
