Description of Work

- Removal of Existing Roadway Markings via Grinding Method
- Installation of New Roadway Striping, Legends, and Markings
- Installation of Signs Posts and Signs
- Installation of Preformed Thermoplastic Bike Markings

Notes:

- Contractor Shall Remove any Roadway Markings in Conflict with the Striping Plans.
- All New Roadway Striping, Markings, and Legends shall be Thermoplastic unless Noted Otherwise.
- All New New Signs Shall be Standard Size with Retroreflective Sign Sheeting.
- Contractor Shall Install Cat Tracks for City review and Approval a Minimum of 7-Calendar Days Before Planned Installation.

NOTES REGARDING EXISTING CONDITIONS. AND TEMPORARY USE OF THE PROJECT SITE:

1.01 GENERAL

- A. THE CONTRACTOR SHALL ASSUME SOLE AND COMPLETE RESPONSIBILITY FOR JOB SITE CONDITIONS DURING THE EXECUTION OF THE CONSTRUCTION WORK INCLUDED IN THIS PROJECT. JOB SITE SAFETY INCLUDES BUT IS NOT LIMITED TO PROTECTING THE SAFETY OF ALL PERSONS AND PROPERTY.
- B. THE REQUIREMENTS NOTED HEREIN SHALL APPLY CONTINUOUSLY AND SHALL NOT BE LIMITED TO NORMAL WORKING HOURS.
- C. CONTRACTOR SHALL POST ON THE PROJECT SITE, EMERGENCY TELEPHONE NUMBERS FOR AMBULANCE, POLICE AND FIRE DEPARTMENTS.
- D. THE CONTRACTOR IS RESPONSIBLE FOR POSTING ANY OFF-SITE OR ON-SITE SIGNS REQUIRED BY THE CITY OF LOS ALTOS AND SANTA CLARA COUNTY.

1.02 SAFETY

- A. PERFORM ALL WORK IN COMPLIANCE WITH ALL APPLICABLE FEDERAL, STATE AND REGIONAL STATUTES, LAWS, REGULATIONS, RULES, AND ORDINANCES. REQUIREMENTS NOTED IN APPLICABLE FEDERAL, STATE AND REGIONAL STATUTES, LAWS, REGULATIONS, RULES, AND ORDINANCES ARE AMENDED FREQUENTLY AND THE CONTRACTOR IS RESPONSIBLE FOR COMPLYING WITH ALL AMENDMENTS AS THEY BECOME EFFECTIVE. INTERIM RULES AND SIMILAR PUBLISHED DOCUMENTS SHALL BE INCLUDED AS A PART OF ALL APPLICABLE FEDERAL, STATE AND REGIONAL STATUTES, LAWS, REGULATIONS, RULES, AND ORDINANCES.
- B. THE CONTRACTOR SHALL PROVIDE ALL LIGHTS, SIGNS, BARRICADES, FENCES, FLAGPERSONS, AND OTHER DEVICES NECESSARY TO PROVIDE FOR PUBLIC SAFETY AS WELL AS FOR THE SAFETY OF WORKERS.

1.03 PROTECTION OF EXISTING SITE IMPROVEMENTS

- A. THE CONTRACTOR SHALL BE RESPONSIBLE FOR PROTECTING ALL EXISTING UTILITIES AND LANDSCAPING INDICATED TO REMAIN AT AREAS DESIGNATED FOR THE CONTRACTOR'S USE.
- B. PROTECT SIDEWALKS, FENCES, TREES, SHRUBS, VINES, GROUNDCOVER, AND ALL EXISTING CONSTRUCTION ON ADJACENT PUBLIC AND PRIVATE PROPERTY AT ALL AREAS USED BY THE CONTRACTOR UNLESS NOTED OTHERWISE.
- C. PROTECT STREET LIGHTS, STORM DRAINS, AND ALL UNDERGROUND AND OVERHEAD UTILITIES ON ADJACENT PUBLIC AND PRIVATE PROPERTY
- D. SEE SPECIFICATIONS AND OTHER DOCUMENTS INCLUDED IN THE CONTRACT DOCUMENTS FOR REQUIREMENTS FOR PROTECTION OF EXISTING CONSTRUCTION AND FOR REPAIR OF DAMAGE CAUSED BY THE CONTRACTOR TO BUILDINGS, PUBLIC ROADS, ASPHALT AND CONCRETE PAVING, FENCES, LANDSCAPED AREAS, TREES, SHRUBBERY, POLES, AND OTHER ITEMS. ALL DAMAGE SHALL BE MADE GOOD BY THE CONTRACTOR AT HIS OWN EXPENSE TO THE SATISFACTION OF THE CITY.

1.04 PROTECTION OF WASTE DISPOSAL AND STORM WATER RUNOFF DRAINAGE SYSTEMS

- A. THE CONTRACTOR SHALL PREVENT DIRT, DEBRIS OR OTHER FOREIGN MATTER FROM ENTERING PLUMBING DRAINS AND OTHER PIPE OPENINGS THAT COULD RESULT IN DIRT, DEBRIS OR OTHER FOREIGN MATTER ENTERING THE BUILDING WASTE DISPOSAL SYSTEMS.
- B. THE CONTRACTOR SHALL PREVENT DIRT, DEBRIS OR OTHER FOREIGN MATTER FROM ENTERING THE ROOF DRAINS, AREA DRAINS, AND OTHER PIPE OPENINGS THAT COULD RESULT IN DIRT, DEBRIS OR OTHER FOREIGN MATTER ENTERING THE STORM DRAINAGE SYSTEMS
- C. THE CONTRACTOR SHALL COMPLY WITH THE "BLUEPRINT FOR A CLEAN BAY", SHEET 9 OF THE PLANS.

GENERAL NOTES (CONTINUED)

1.05 ACCESS

- A. MOVEMENT OF HEAVY EQUIPMENT SHALL BE CONFINED TO EXISTING PAVED SURFACES UNLESS OTHERWISE APPROVED BY THE CITY.
- B. MAINTAIN UNOBSTRUCTED FIRE LANES THROUGH THE SITE, AND MAINTAIN ACCESS TO FIRE HYDRANTS AS REQUIRED BY FIRE DEPARTMENT. NO TEMPORARY CONSTRUCTION, MATERIAL STORAGE, PARKING OR OTHER CONTRACTOR ACTIVITY WILL BE PERMITTED IN DESIGNATED FIRE LANES EXCEPT FOR PERFORMANCE OF WORK SPECIFICALLY REQUIRED BY CONTRACT DOCUMENTS.

1.06 HOISTING

- A. CRANES, HOISTS, LIFTS, AND OTHER MATERIAL HANDLING EQUIPMENT SHALL BE LOCATED ONLY ON PAVED AREAS UNLESS OTHERWISE APPROVED BY THE CITY.
- B. ACCESS FOR PURPOSES OF INSTALLING AND REMOVING CRANES, HOISTS, LIFTS, AND OTHER MATERIAL HANDLING EQUIPMENT SHALL BE COORDINATED WITH THE CITY.

1.07 TEMPORARY UTILITIES

- A. THE CONTRACTOR SHALL ASSUME THAT WATER, SANITARY SEWER, POWER, AND COMMUNICATIONS SERVICES ARE NOT AVAILABLE ON THE SITE.
- B. CONNECTIONS TO EXISTING UTILITY COMPANY SERVICES ON THE PROJECT SITE OR ADJACENT TO THE SITE MAY OR MAY NOT BE AVAILABLE. THE CITY MAKES NO REPRESENTATIONS REGARDING THE AVAILABILITY OF UTILITIES ON THE SITE. CONNECTIONS TO EXISTING UTILITIES ON OR OFF THE SITE SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR.
- C. THE CONTRACTOR SHALL BE RESPONSIBLE FOR PROVIDING ALL UTILITIES REQUIRED TO COMPLETE THE EXECUTION OF THE WORK, AND THE COST TO PROVIDE ALL TEMPORARY UTILITY SERVICES REQUIRED TO EXECUTE THE WORK SHALL BE BORNE BY THE CONTRACTOR
- D. CONNECTION TO EXISTING FIRE HYDRANTS TO OBTAIN WATER FOR CONSTRUCTION PURPOSES WILL NOT

1.08 TEMPORARY STORAGE

- A. DEBRIS RESULTING FROM DEMOLITION OPERATIONS SHALL NOT BE STORED IN AREAS ACCESSIBLE TO THE PUBLIC. REMOVE DEBRIS AT THE END OF EACH DAY.
- B. AREAS WHERE MATERIALS AND DEBRIS ARE STORED SHALL BE SECURED TO THE SATISFACTION OF THE CITY.
- C. ALL HAZARDOUS MATERIALS ARE TO BE STORED AS FOLLOWS: PROVIDE A PERIMETER BERM AT LEAST 12 INCHES HIGH, AND LINE THE AREA WITH 10 MIL REINFORCED POLYETHYLENE SHEETING EXTENDING OVER THE BERM. JOINTS BETWEEN SHEETING SHALL BE SEALED WITH WATERPROOF TAPE. ANY SPILLAGE OF SOLID OR LIQUID MATERIAL INTO THE AREA CONTAINED BY THE BERM SHALL BE PROMPTLY REMOVED BY THE CONTRACTOR AND DISPOSED OF IN A LEGAL MANNER.

GENERAL NOTES (CONTINUED)

GENERAL NOTES REGARDING THE EXECUTION OF THE WORK

2.01 SCHEDULING OF CONSTRUCTION WORK

- A. SEE THE SPECIFICATIONS AND OTHER DOCUMENTS INCLUDED IN THE CONTRACT DOCUMENTS FOR SCHEDULING REQUIREMENTS. THE FOLLOWING IS ADDITIONAL TO ANY REQUIREMENTS DESCRIBED IN OTHER DOCUMENTS INCLUDED IN THE CONTRACT DOCUMENTS.
- B. WORKING HOURS SHALL BE BETWEEN 8:00 AM AND 5:00 PM MONDAY THROUGH FRIDAY. WORK OUTSIDE THESE HOURS OR ON WEEKENDS WILL NOT BE PERMITTED WITHOUT PRIOR WRITTEN APPROVAL FROM THE CITY.

2.02 NOISE AND POLLUTION CONTROL

- A. PERFORM ALL WORK IN CONFORMANCE WITH THE REQUIREMENTS OF ALL APPLICABLE FEDERAL, STATE OF CALIFORNIA, REGIONAL, AND LOCAL STATUTES, LAWS, REGULATIONS, RULES, ORDINANCES, CODES, AND STANDARDS REGARDING NOISE, AIR, AND WATER POLLUTION CONTROL.
- B. THE USE OF CUTTING OR HAMMERING OR OTHER EQUIPMENT SHALL BE LIMITED TO THAT ALLOWED BY THE NOISE ORDINANCES OF THE CITY OF LOS ALTOS, AND AS ALLOWED BY ALL APPLICABLE FEDERAL, STATE, REGIONAL, AND LOCAL STATUTES, LAWS, REGULATIONS, RULES, AND ORDINANCES. THE USE OF EQUIPMENT THAT IS NOT IN ACCORDANCE WITH SUCH REGULATORY AND OTHER NOISE LIMITATION REQUIREMENTS IS PROHIBITED.

2.03 EXISTING UTILITIES

- A. THE DRAWINGS DO NOT DESCRIBE THE FULL EXTENT OF EXISTING UTILITIES DISTRIBUTION SYSTEMS ON THE SITE. CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING AND PROTECTING ALL EXISTING UTILITIES.
- B. SEE UTILITIES DEMOLITION NOTES FOR SPECIFIC REQUIREMENTS RELATING TO UTILITIES.
- C. PROVIDE A MINIMUM OF 12 CALENDAR DAYS NOTICE TO THE CITY REGARDING SHUT-DOWN OF UTILITIES TO FACILITATE DEMOLITION WORK.

2.04 TRUCK ROUTES

A. TRUCK ROUTES FOR CONSTRUCTION TRAFFIC SHALL CONFORM TO REQUIREMENTS OF TITLE 8, CHAPTER 8.16 OF THE CITY OF LOS ALTOS MUNICIPAL CODE.

from Heavy Equipment on Construction Sites

Doing the Job Right

cleanup is easier.

Site Planning and Preventive Vehicle

Do not use diesel oil to lubricate equipment

Cover exposed fifth wheel hitches and other oily or greasy equipment during rain events.

Storm water Pollution

Poorly maintained vehicles and heavy equipment that leak fuel, oil, antifureeze or other fluids on the construction site are common sources of storm drain pollution. Prevent spills and leaks by lealiting equipment from runoff channels, and by watching for leaks and other maintenance problems. Remove construction equipment from the site as soon as possible

- Clean up soills immediately when they
- □ Never hose down "dirty" pavement or impermeable surfaces where fluids have spilled. Use dry cleanup methods (absorbent materials, cat litter, and/or rags) whenever possible and properly dispose of absorbent materials. Perform major maintenance, repair jobs, and vehicle and equipment washing off site where
 - Sweep up spilled dry materials immediately. Never attempt to "wash them away" with water, or bury them
 - Use as little water as possible for dust control. Ensure water used doesn't eave silt or discharge to storm drains
 - Clean up spills on dirt areas by digging up and properly disposing of contaminated soil.
 - Report significant spills to the appropriate local spill response agencies immediately.
 - If the splil poses a significant hazard to human health and safety, property or the environment, you must also report it to the State Office of Emergency

Roadwork and Paving

Best Management Practices for the Construction Industry

Best Management Practices for the

- Seal coat contractors
- Operators of grading equipment, paving machines, dump trucks, concrete mixers Construction inspectors
- Home builders Developers

Doing The Job Right

- General Business Practices
- Develop and implement erosion/sediment
- ☐ Schedule excavation and grading work during Check for and repair leaking equipment.
- Perform major equipment repairs at designated areas in your maintenance yard, where cleanup is easier. Avoid performing equipment repairs at construction sites. Park paving machines over drip pans or absorbent material (cloth, rags, etc.) to catch drips when not in use. Clean up all spills and leaks using "dry"
- When refueling or when vehicle/equipment maintenance must be done on site, designate a location away from storm drains and creeks
- Do not use diesel oil to lubricate equipment parts or clean equipment.
 Recycle used oil, concrete, broken asphalt, etc. whenever possible, or dispose of properly. Collect and recycle or appropriately dispose of excess abrasive gravel or sand. Avoid over-application by water trucks

During Construction

- Avoid paving and seal coating in wet weather. or when rain is forecast, to prevent fresh materials from contacting stormwater runoff.
- Cover and seal catch basins and manholes when applying seal coat, slurry seal, fog seal or similar materials.
- ☐ Protect drainage ways by using earth dikes, sand bags, or other controls to divert or trap and filter runoff.

Storm Drain Pollution from Roadwork

Road paving, surfacing, and pavement removal happen right in the street, where there are numerous opportunities for sephalt, saw-cut slurry, or excevated material to liegally enter storm drains. Extra planning is required to store and dispose of materials properly and guard against pollution of storm drains, creeks, and the Bay.

Keep all liquid paint products and wastes away from the gutter, street, and storm drains. Liquid residues from paints, thinners,

lous wastes and must be dispo

a hazardous waste collection facility (contact your local stormwater program listed on the back of this brochure).

solvents, glues, and cleaning fluids are

Doing The Job Right

dling Paint Products

Never wash excess material from exposed-aggregate concrete or similar treatments into a street or storm drain. Collect and recycle, or dispose to dirt Fresh Concrete and Mortar Cover stockpiles (asphalt, sand, etc.) and other construction materials with plastic tarps. Protect from rainfall and prevent runoff with temporary roofs or

Application Best Management Practices for the Construction Industry

Best Management Practices for the

- Sidewalk construction crews Patio construction workers
- Construction inspectors
- General contractors Home builders
- Developers
- Concrete delivery/pumping workers

Doing The Job Right General Rusiness Practices

Always store both dry and wet materials under cover, protected from rainfall and runoff and away from storm drains or waterways. Protect dry materials from wind.

☐ Secure bags of cement after they are open. Be

Storm Drain Pollution from Fresh

Concrete and Mortar Applications

Fresh concrete and cement-related mortars that wash into lakes, streams, or estuanes are toxic to fish and the aquatic environment. Disposing of the materials to the storm drains or creeks can block

form drains, causes serious problems, and is

Los Altos Municipal Code Requirements

Unlawful discharges. It shall be unlawful to discharge any domestic waste or industrial waste into storm drains, gutters, creeks

Unlawful discharges. It shall be unlawful to discharge any domestic waste or industrial waste into sorm drains, squiters, creeks, or San Francisco Bay. Unlawful discharges to storm drains shall include, but not be limited to, discharge from follets; sinks; industrial processes; cooling systems; boilers; fabric cleaning; equipment cleaning; verbice cleaning; controlled to, painting, paving, concrete placement, saw cutting and grading; swimming pools; spas; and fountains, unless specifically permitted by a discharge permit or unless exempted pursuant to guidelines published by the superintendent.

Threatened discharges, it shall be unlawful to cause hazardous materials, domestic waste, or industrial waste to be deposited in such a manner or location as (o constitute a threatened discharge into storm drains, gutters, creeks or San Francisco Bay. A "threatened discharge" is a condition creating a substantial probability of harm, when the probability and potential extent of harm sale, it cannot be received to the property or natural.

make it reasonably necessary to take immediate action to prevent, reduce or mitigate damages to persons, property or natura

A spill response plan for hazardous waste, hazardous materials and uncontained construction materials shall be prepared an

available at the construction sites for all projects where the proposed construction site is equal to or greater than one acre of disturbed soil and for any other projects for which the city engineer determines is necessary to protect surface waters. Preparation of the plan shall be in accordance with guidelines published by the city engineer.

A storm water pollution prevention plan shall be prepared and available at the construction sites for all projects greater than on

A storm water pollution prevention plan shall be prepared and available at the construction sites for all projects greater than one acre of disturbed soil and for any other projects for which the city engineer determines that a storm water management plan is necessary to protect surface waters. Preparation of the plan shall be in accordance with guidelines published by the city engineer. Prior approval shall be obtained from the city engineer or designee to discharge water pumped from construction sites to the storm drain. The city engineer or designee may require gravity settling and filtration upon a determination that either or both would improve the water quality of the discharge. Contaminated groundwater or water that exceeds state or federal requirements for discharge to navigable waters may not be discharged to the storm drain. Such vater may be discharged to the severy, provided that the requirements of Section 10,08.240 are met and the approval of the superintendent is obtained prior to discharge. No cleanup of construction debris from the streets shall result in the discharge of water to the storm drain system; nor shall any activation debris for a callowed by the deposited in the storm drain system. (Prior code 8, 55, 543)

construction debris be deposited or allowed to be deposited in the storm drain system. (Prior code § 5-5.643)

You may be held responsible for any environmental damage

Domestic or industrial wastes that are no longer contained in a pipe, tank or other container are considered to be

prohibited by law.

Los Altos Municipal Code Chapter 10.08.390 Non-storm water discharges

reatened discharges unless they are actively being cleaned up

Criminal and judicial penalties can be assessed for non-compliance.

Los Altos Municipal Code Section 10.08,430 Requirements for construction operations.

Do not use diesel fuel as a lubricant on

sure to keep wind-blown cement powder away from streets, gutters, storm drains, rainfall, and runoff.

☐ Wash out concrete mixers only in designate wash-out areas in your yard, away from storm wash-out areas in your yard, away from storm drains and waterways, where the water will flow into a temporary waste pit in a dirt area. Let water percolate through soil and dispose o settled, hardened concrete as garbage. Whenever possible, recycle washout by pumping back into mixers for reuse.

During Construction

- When cleaning up after driveway or sidewalk construction, wash fines onto dit areas, not down the driveway or into the street or storm drain.
- Protect applications of fresh concrete and mortar from rainfall and runoff until the material has dried.
- (1) flow onto a dirt area; (2) drain onto a bermed surface from which it can be pumped and disposed of properly; or (3) be vacuumed from a catchment created be vacuumed from a catcriment created by blocking a storm drain inlet. If necessary, divert runoff with temporary berms. Make sure runoff does not read gutters or storm drains.
- When breaking up pavement, be sure to pick up all the pieces and dispose of property. Recycle large chunks of broken concrete at a landfill.
- ☐ Never bury waste material. Dispose of small amounts of excess dry concrete grout, and mortar in the trash.
- Never dispose of washout into the street, storm drains, drainage ditches, or

this drawing sheet. Spill Response Agencies

Preventing Pollution:

It's Up to Us

In the Santa Clara Valley, storm drains

transport water directly to local creeks

and San Francisco Bay without treatment.

Storm water pollution is a serious problem

for wildlife dependent on our waterways and for the people who live near polluted

streams or bay lands. Some common

sources of this pollution include spilled oil,

fuel, and fluids from vehicles and heavy

equipment; construction debris; sediment

created by erosion; landscaping runoff

containing pesticides or weed killers; and

materials such as used motor oil,

antifreeze, and paint products that people

Thirteen valley municipalities have joined

together with Santa Clara County and the

Santa Clara Valley Water District to

educate local residents and businesses

and fight storm water pollution. TO

comply with this program, contractors

most comply with the practices described

pour or spill into a street or storm drain.

- Inspectors
- Home builden Developers

Storm Drain Pollution from **Construction Activities**

enstruction sites are common sources of stom eter pollution. Materials and wastes that blow of water pollution. Meaternase arral westers that town wash into a storm drain, guitter, or street have a direct impact on local creeks and the Bay. As a contractor, or site supervisor, owner or operator of a site, you may be responsible for any environmental damage caused by your

Doing The Right Job

- General Business Practices

 Protect stockpiles and landscaping materia
 from wind and rain by storing them under to
 or secured plastic sheeting.

 Store pesticides, fertilizers, and other
 chemicals indoors or in a shed or storage
- ☐ Schedule grading and excavation projects
- luring dry weather
- during dry weather.

 Use temporary check dams or ditches to divert nuncif away from storm drains.

 Protect storm drains with sandbags or other
- sediment controls.

 Re-vegetation is an excellent form of erosion control for any site
- Landscaping/Garden Maintenance Use pesticides sparingly, according to instructions on the label. Rinse empty
- containers, and use rinse water as produc Dispose of rinsed, empty containers in the rash. Dispose of unused pesticides as
- Collect lawn and garden clippings, pruning waste, and tree trimmings. Chip if necessary
- In communities with curbside pick-up of vard in communities was the place clippings and pruning waste at the curb in approved bags or containers. Or, take to a landfill that composts yard waste. No curbside pickup of yard waste is available for commercial properties.

Storm Drain Pollution From Landscaping and Swimming Pool Maintenance

Many landscaping adhitties expose soils and increase the likelihood that earth and garden chemicals will run off into the storm drains during irrigation or when it rains. Swimming pool water containing chlorine and copper-based algaecides should never be discharged to storm drains. These chemicals are toxic to aquatic life.

Keep an orderly site and ensure good housekeeping practices are used.
 Maintain equipment properly.
 Cover materials when they are not in use.

Keep materials away from streets, storm drains.

☐ Ensure dust control water doesn't leave site or

discharge to storm drains.

Advance Planning To Prevent Pollution

Schedule excavation and grading activities for dry weather periods. To reduce soil erosion,

as a reference.

Control the amount of runoff crossing your site (espacially during excavation) by using berms for temporary or permanent drainage diches to divert water flow around the site. Reduce storm water runoff velocities by constructing temporary check dams or berms where appropriate.

check dams or berms where appropriate.

Train your employees and subcontractors.

Make these best management practices available to everyone who works on the construction site. Inform subcontractors about the storm water requirements and their own reconnectibilities.

sekeeping Practices

Good Housekeeping Fractices

☐ Designate one area of the site for auto parking, vehicle refueling, and routine equipment maintenance. The designated area should be well away from streams or storm drain inlets,

site.

Keep materials out of the rain – prevent runoff contamination at the source. Cover exposed piles of soil or construction materials with plastic sheeting or temporary roofs. Before it rains, sweep and remove materials from surfaces that drain to storm drains, creeks, or channels.

ned if necessary. Make major repairs off

plant temporary vegetation or place other erosion controls before rain begins. Use the Erosion and Sediment Control Manual, available from the Regional Water Quality Control Board,

Doing The Job Right General Principals

and drainage channels.

Do not blow or rake leaves, etc. into the street, or place yard waste in gutters or on dirt shoulders, unless you are piling them for recycling (allowed by San Jose and unincorporated County only). Sweep up any leaves, litter or residue in gutters or on stool

In San Jose, leave yard waste for curbside recycling pickup in piles in the street, 18 inches from the curb and completely out of the flow line to any storm drain.

Pool/Fountain/Spa Maintenance Draining Pools Or Spas

When it's time to drain a pool, spa, or fountain, please be sure to call your local wastewater treatment plant before you start for further guidance on flow rate restrictions, backflow prevention, and handling special cleaning waste (such as a cid wash). Discharge flows shall not exceed 100 gallon per minute.

- Never discharge pool or spa water to a street or storm drain; discharge to a sanitary sewer cleanout.
- possible, when emptying a pool or spa t chlorine dissipate for a few days and then recycle/reuse water by draining it gradually onto a landscaped area. Do not use copper-based algaeoides. Control algae with chlorine or other alternatives, such as sodium bromide.

Filter Cleaning

- ☐ Never clean a filter in the street or near a storm drain. Rinse cartridge and diatomaceous earth filters onto a dirt area and spade filter residue into soil. Dispose of spent diatomaceous earth in the
- ☐ If there is no suitable dirt area, call your local wastewater treatment plant for instructions on discharging filter backwash or rinse water to the sanitary sewer.

Clean up leaks, drips and other spills immediately so they do not contaminate soil or groundwater or leave residue on paved surfaces. Use dry cleanup methods whenever possible. If you must use water, use just enough to keep the dust down.

use just enough to keep the dust down.

Cover and meintain dumpsters. Check frequently for leaks. Place dumpsters under roots or cover with tarps or plasts sheeting secured around the outside of the dumpster. Never olean out a dumpster by hosing it down on the construction site.

Set portable toilets away from storm drains. Make sure portable toilets are in good working order. Check frequently for leaks.

Materials/Waste Handling

Practice Source Reduction – minimize waste when you order materials. Order only the amount you need to finish the job.

Use recyclable materials whenever

metal, solvents, degreasers, cleared vegetation, paper, rock, and vehicle maintenance materials such as used oil

artifireeze, bottenes, and tires.
Dispose of all westes properly. Many construction materials and westes, including solvents, water-based paints, vehicle fluids, broken asphalt and concrete vocd, and cleared vegetation can be recycled. Materials that cannot be recycled. Materials that cannot be recycled must be taken to an appropriate landfill or disposed of as hazardous waste. Never bury waste materials or leave them in the street or near a creek or stream bed ermits.

In addition to local building permits, you

And

even if paint chips are not present. Before you begin stripping paint or obeaning pre-1978 building exteriors with water under high pressure, test paint for lead by taking paint scrapnigs to a local laboratory. See Yellow Pages for a state-certified laboratory. The paint is close paint on the building, or if the paint tests positive for lead, block storm drains. Chock with the wastewater treatment plant to determine whether you may discharge water to the sanitary sewer, or if you must send it offsite for disposal as hazardous waste.

Storm Drain Pollution from

Paints, Solvents, and Adnesives All pairts, solvents, and adhesives contain chemicals that are harmful to wildlife in local creeks, San Francisco Bay, and the Paolic Ocean Toxic chemicals may come from liquid or solid products or from cleaning residues or rags. Pairt material and wastes, adhesives and cleaning fluid should be recycled when possible, or disposed of properly to prevent these materials from flowing into storm drains and watercourses.

Doing The Job Right

General Rusiness Practices

When refueling or vehicle/equipment

Practices During Construction

Do not use diesel oil to lubricate equipment

Paints, Solvents, and Adhesives

najor equipment repairs away from the

naintenance must be done on site, designate a ocation away from storm drains.

Remove existing vegetation only when absolutely necessary. Plant temporary vegetation for erosion control on slopes or where construction is not immediately planned. Protect down slope drainage courses, streams, and storm drains with wattles, or temporary drainage swales. Use check dams or ditches to elivert morth ground exequations. Select to the divert morth ground exequations.

Storm Drain Pollution

and Dewatering

oil excavation and grading operations loosen large mounts of soil that can flow or blow into storm

amounts of soil that can how or blow into storm drains when handled improperly. Sediments in runoff can clog storm drains, smother aquatic life, and destroy habitats in creeks and the Bay. Effective erosion control practices reduce the amount of runoff crossing a site and slow the flow with check dams or roughened ground water is a common problem in the Santa Clara Valley. Depending on soil types and site history, groundwater pumped from construction sites may be contaminated with toxics (such as a did rolvents) or laden with sediments. Any of these pollutants can harm wildlife in creeks or the Bay, or interfere with wastewater treatment plant operation.

scharging sediment-laden water from a watering site into any water of the state

For oil-based paints, paint out brushes to the extent possible and clean with thinner or solvent in a proper container. Filter and reuse thinners and solvents. Dispose of

plastic sheets and berms.

Asnhalt/Concrete Removal

After breaking up old pavement, be sure to remove all chunis and pieces. Make sure broken pavement does not come in contact with rainfall or runoff.

Ontact with raintail or runour.

When making saw cuts, use as little water as possible. Shovel or vacuum saw-cut sturry and remove from the site Cover or protect storm drain inlets during saw-cuting. Sweep up, and properly dispose of, all residues.

Sweep, never hose down streets to clean up tracked dirt. Use a street sweeper or vacuum truck. Do not dump vacuumed liquor in storm drains.

Painting Cleanup

Never clean brushes or rinse paint

containers into a street, gutter, storm drain, French drain, or stream.

Growater-based paints paint out

brushes to the extent possible, and rinse into a drain that goes to the sanitary sewer. Never pour paint down a storm

and/or rags), or dig up, remove, and property dispose of contaminated so

- When throughly dry, empty paint cans, used brushes, rags, and drop cloths may be disposed of as garbage in a sanitary landfill Empty, dry paint cans also may be recycled as excess liquids and residue as hazardous Paint Removal ☐ Wash water from painted buildings const Paint chips and dust from non-ha dry stripping and sand blasting may be swept up or collected in plastic drop cloths and disposed of as trash. before 1978 can contain high amounts of lead, even if paint chips are not present. Before you
 - and disposed of as trash.

 Chemical paint stripping residue and chips and dust from marine paints or paints containing lead, mercury or thickly tin must be disposed of as hazardous wastes. Lead based paint removal requires a state-certified contractor.

 When stripping or cleaning building exteriors with high-pressure water, block storm drains. Direct wash water onto a dirt area and spade into soil. Or, check with the local wastewater treatment authority to
 - the local wastewater treatment authority to find out if you can collect (mop or vacuum) building cleaning water and dispose to the sanitary sewer. Sampling of the water ma be required to assist the wastewater treatment authority in making its decision.

Recycle/Reuse Leftover Paints Whenever Possible

Dewatering Operations

- Check for Sediment Levels
- sunk part way into a small pit filled with gravel; Pumping from a bucket placed below water fevel using a submersible pump. Pumping through a filtering device such as a swimming pool filter or filter fabric wrapped around end of suction one.
- pipe.

 When discharging to a storm prain, protect the inlet using a barrier of burlap bags filled with drain rock, or cover inlet with filter fabric anchored under the grate. OR pump water through a grassy swale prior to discharge.

- Check for Toxic Pollutants
 Check for odors, discolaration, or an oily sheen on groundwater.
 Call your local wastewater treatment agency and ask whether the groundwater must be tested.
- 2. Check for Sediment Levels

 If the water is clear, the pumping time is
 less than 24 hours, and the flow rate is
 less than 20 galons per minute, you may
 pump water to the street or storm drain.

 If the pumping time is more than 24 hours
 and the flow rate greater than 20 gpm,
 call your local westewater treatment plant
 for guidance.

 If the water is not clear, solids must be
 litered to settled out the yournings to a
- illitered or settled out by pumping to a settling tank prior to discharge. Options for filtering include: Pumping through a perforated pipe sunk part way into a small pit filled

Blueprint for a Clean Bay Remember: The property owner and the contractor share ultimate responsibility for the activities that occur on a construction site.

Best Management Practices for the **Construction Industry**

caused by your subcontractors or employees.
