

Socks in a Box

Math: There are lots of ways to make 10!

- Grab a box and 10 baby socks (or 10 of anything...it's just nice that socks rhymes with *box!*)
- Have your child close his/her eyes while you remove some socks from the box.
- Ask them how many socks are left in the box?
- Need help? Have them hold up 10 fingers. Then ask them to count and bend the fingers that match the number of socks *outside* the box. Then have them count the fingers that are still raised! Or model this and have them count your fingers.
- Want more? Ask them to write the equation (addition, subtraction, or both!)
