

Cardboard Hideout

(Kinder Prep 2020)

Photo by Tatiana Syrikova from Pexels

Supplies:

- Cardboard (note: extra large, flat pieces can be found at Costco . . . just ask!)
- Serrated knife or exacto knife
- Markers, crayons, paint
- Painters tape

How to:

1. Sketch your design...is it a house? A castle? A boat?
2. Cut out your design. Leave one edge uncut on a door, hatch, or window so it can swing open. (Tip: a pointy, serrated knife works well and you can cut out your design while holding the cardboard vertically rather than laying it on the ground).
3. Use painters tape to attach the sides of your cardboard to a door opening.
4. Have fun!

More ideas:

- Use chalkboard spray paint to cover your piece after you've cut it out. Use chalk to decorate it.
- Push hanging clothes aside and tape the piece to the inside of an open closet door . . . it's now a *secret* hideout.
- Tape sides to your structure so it's free standing (see castle picture).
- Duct tape fabric to the top of windows (on the inside).
